

NC 6x50

TACTICAL CQB SIGHT

The NC 6x50 is a newly developed holographic sight with a lit reticle. The 6x magnification makes this scope an ideal choice for CQB to medium range encounters. The structurally rugged body is built using special light-weight materials allowing the scope to cope with high recoil.

The lit reticle allows the user to operate the scope in various environments.

Built-in picatinny mount system allows the operator of the scope to quickly mount it on the weapon.
