

NVS 7-3/5xAG

AUTO-GATED NIGHT VISION BINOCULAR

Display

Based on the popular NVS 7 night vision goggles series, the NVS 7-3/5xAG is suitable for defence, marine and SAR operations that take place in the world's darkest tactical environments. Available in 4x, 5x and 8x magnification configurations, there is a binocular model for virtually any detection, recognition and identification requirement. The NVS 7-3/5xAG is the smallest and lightest handheld night vision binocular in its class, due to its unique catadioptric lens, which dramatically reduces its size and weight profile relative to other 5x devices.
