

Spotting scope users demand top quality optics that perform flawlessly under all weather conditions. Whether at the range or in the field, the 20-60 x 80 brings your target into clear, consistently-sharp, high-contrast focus, especially at the kind of distances that overwhelm lesser optics.

The angled eyepiece position permits a lower scope mounting height, which allows better stability and user comfort. Scopes are nitrogen filled, waterproof and nitrogen field, dustproof, and shock-resistant.

All Newcon Spotting Scopes feature powerful lenses, and come standard with a durable, padded field carrying case.

FEATURES:

- Powerful FMC optics in polycarbonate rubber armoured body
- BAK-4
- Long eye relief
- Objective lens and eye piece protective caps
- Sliding dew shield reduces glare
- Waterproof and nitrogen filled
- Lightweight and shock resistant
- Fogproof
- Sturdy compactable tripod with full horizontal and vertical control and padded leg-wraps made of anodized steel (Spotter Only)

ACCESSORIES:

- Case
- Lens cleaning cloth
- Manual
- Warranty card

OPTIONAL:

- Universal Digital Adapter

Spotter
