Night Vision Monocular

## SPOTTER NC SPOTTING SCOPE

Spotting scope users demand top quality optics that perform flawlessly under all weather conditions. Whether at the range or in the field, the 20-60 x 80 brings your target into clear, consistently-sharp, high-contrast focus, especially at the kind of distances that overwhelm lesser optics.

The angled eyepiece position permits a lower scope mounting height, which allows better stability and user comfort. Scopes are nitrogen filled, waterproof and shock-resistant.

All Newcon Spotting Scopes feature powerful lenses, and come standard with a durable, padded field carrying case.

### FEATURES:

- Powerful FMC optics in polycarbonate rubber armoured body BAK-4
- Long eye relief
- Objective lens and eye piece protective caps
- Sliding dew shield reduces glare
- Waterproof and nitrogen filled
- Fogproof
- Lightweight and shock resistant

### ACCESSORIES:

- Case
- Lens cleaning cloth
- Manual
- Warranty card
- Tripod

### OPTIONAL:

- Universal Digital Adapter

### Specifications

Model	Spotter NC
Magnification	20x - 60x
Objective lens diameter, mm	80
Field of View, @1000 yd	89 - 44
Eye Relief, mm	18 - 15
Twilight factor	16.5 (20x), 1.8 (60x)
Brightness	39.7 (20x), 69.3 (60x)
Resolution dioptic adjusment	± 7
Pressure resistance, min	0.5 Bar
Tripod mount, height	¼ inch , 250 mm / 10"
Tripod pan, tilt	360°, - 60° / +90°
Dimensions, mm	335 x 170 x 95
Weight, g	1300
