

## **SIB 16x50M Stabilized Binoculars**

★★★★★ 5 Stars

Always wanted Stabilized Binoculars for my boat. Thanks to Russians, now I have one. In my opinion, what I paid for, this is an excellent product (I was told that it has a titanium body). Sleek, light and works. My boater friends agree with me on that, the ones borrowed anyway. Best feature: no battery. I don't know about others but why pay tons for equal product. Anyway, everybody has different idea about value but, after a long search, this is the best unit money could buy. Enjoy yours. Bob

West Marine LRM review

### **Strengths:**

Superb optical. Extensive menu.

Feels good in hands. Good quality over-all.

### **Weaknesses:**

I was able to range 1397 yards. No more (much better measurements than my old Bushnell. Never able to come this close.)

I know many factors might influence full measurement range.

### **Review Summary: \***

Thank you West Marine for given us the best quality and value.

It is a good product. I have bought one for my son too.

Price: Good value for my money.

Best part: Made in Canada.

I would recommend it highly.

Agi
